Product Name :	**Product Code :**
Electrical Circuit Fault Trainer	NEP0029

Description :

Electrical Circuit Fault Trainer

Technical Specification :

Familiarization of circuit protection devices and its work principle.

Familiarization of earth leakage protection and over current protection installation.

Install circuit of direct on line starter (DOL) circuit by using regulated cam switch.

Install circuit of "start-stop three phase induction motor circuit completed by control safety devices.

trouble shooting of emergency switch and MCB.

Testing and setting a thermal overload. Install and check power lamp indicators and control lamp indicators

Do trouble shooting of lamp indicators. Install and operate the three phase induction motor control from two locations.

Install and operate the forward and reverse of three phase induction motor circuit by using magnetic contactors.

Install circuit of three phase induction motor by using time delay relay and magnetic contactors. Analyze and trouble shooting of starting failure

Electrical and Electronics
