

Product Name :
 Engine Management Principle

Product Code :
 MEE-AEE-0004

Description :

Engine Management Principle

Technical Specification :

Engine Management Principle

This trainer should be designed to teach students principles of Engine Management used in modern vehicle through comprehensive practical activities.

The activities include fundamentals of fuel system electronics, transducers, Engine Control Unit, actuators, emission control, self diagnosis and trouble codes.

The trainer should be neatly laid out to represent the typical automobile engine with sensors actuators, fuel system, ignition system, emission system and engine control unit.

The unit should contains a circuit board with electronics components and micro-controller systems, system diagrams, power supply, electrical test leads, and student experiment manual presented in hard copy and pdf format
