

Product Name :
Hydraulic Press Brakes

Product Code :
Shearing0003

Description :

Hydraulic Press Brakes

Technical Specification :

Hydraulic Press Brakes

- Robust steel frame from ultrasonically tested IS 2062 plates and rigid as per guideline of IMTMA standards.
- Hydraulic cylinder with twin type sealing low & high pressure and hard chrome plated rod with special type guide for long life without leakage.

- Repetitive accuracy is within ± 0.04 mm
- International quality Hydraulics component rated for 310 bar (Working Pressure is less than 160 bar) which ensure trouble-free operation.
- Adjustable five piece guides, provided with special nonmetallic liners for long life.
- Quickly adjustable stroke length.
- Front operated back gauge with micro setting arrangement.
- Ram tilting arrangement to maintain bending accuracy over a period.
- Moving work station with ON/OFF buttons, Selector switches for inch, Single cycle & Auto cycle and Emergency Stop buttons for easy operation and better safety.
- Rear Cylinder design using mechanical advantage through lever, reduces the cylinder size which enable to use medium

pressure hydraulic component and also improves stroke accuracy.

- Fast Approach and fast Return speed for reducing cycle time, Slow pressing speed for better stroke control and bend accuracy
