

**Product Name :**  
Microwave Test Bench

**Product Code :**  
NEP0007

## Description :

Microwave Test Bench

## Technical Specification :

Precision made microwave systems, which use standard type rectangular wave-guide components to illustrate the essential elements of this field for study.

The equipment consists of :

- A selection of wave-guide components
- The power supply for the microwave source
- A detector
- A meter, which monitors the detector output

- A Demo Video CD
- Computer Aided Instruction Software
- Microwave Computer Aided Learning Software
- Audio Communication
- Provided with PC to PC communication in Gunn based Bench
- Wall Chart

These Training Bench are completely self-contained & provide the means to allow students to carry out practical work at

extremely low cost. A comprehensive manual containing extensive microwave theory and a progressive series of assignments

is supplied with the Trainer.
