

Product Name :
Transparent Modules Trainer**Product Code :**
EEP0009**Description :**

Transparent Modules Trainer

Technical Specification :

Transparent Modules Trainer

- Design of the transparent modules (including inner parts issued from actual industrial fabrications) allows visualizing internal behavior of each module. It makes the training more rational and time effective.
- Mounting of the modules on a panel allows undertaking complete, sophisticated hydraulic circuits.
- Panel consists in a perforated metal plate sheet, with 5 mm holes at 50 mm spanning.
- Practical works can be quickly and simply carried out.

- The ease for mounting the modules and the overall design of the system make it an efficient support to the hydraulic courseware.
- Vocational training, technical graduation at secondary level, Polytechnics or Engineering schools use the equipment to become more familiar with hydraulic components and hydraulic techniques applying to automation.
- The trainer provides basic knowledge in hydrostatic and hydrodynamics, as well as inputs on physical rules applying to the design of hydraulic components.
- Moreover, it allows developing a know how in symbolic and design of hydraulic and electro hydraulic circuits

Transparent Modules Trainer, Engineering Lab Instrument
